Mission Statement

The State Fire Marshal's Office participates in and coordinates an integrated statewide system designed to protect human life from fire and explosions through fire prevention, investigation, and public education activities. The program includes code enforcement and the operation of the Idaho Fire Incident Reporting System. The State Fire Marshal's Office provides assistance to local fire agencies throughout the state.

KNUTE C. SANDAHL
State Fire Marshal

July 1, 2018

Honorable C.L. "Butch" Otter
Governor, State of Idaho
Statehouse
Boise, Idaho 83720

Dear Governor Otter,

I present to you the 2017 State Fire Marshal's Annual Report. This report includes data and information collected from fire service providers including municipal fire departments, fire districts, and fire protection associations throughout Idaho.

Fire service providers contribute statistical data through the Idaho Fire Incident Reporting System (IFIRS). Of the 251 organized fire service providers, 181 contributed data through this system. This system is important in identifying fire-related activity, including trends or problems with consumer products, and aids in designing specific fire prevention initiatives.

We continue to increase our visibility through social media and to improve our website by providing resources and information easily accessible to local fire service providers and their constituents. Our expertise in fire investigations throughout the state has steadily grown. In 2017, we responded to 118 fire investigations working closely with local fire services, law enforcement, federal investigative agencies, and insurance industry experts.

Our relationship with the Idaho Department of Lands and federal wildfire responders continues to demonstrate our commitment to preventing wildfires and identifying those who are negligent or careless with fires on our public lands. This relationship is vitally important to our state as wildfires continue to devastate our natural areas and adversely affect populated areas.

Respectfully submitted,

Knute C. Sandahl

Knute Sandahl,
Idaho State Fire Marshal

ABOUT THE STATE FIRE MARSHAL'S OFFICE

Through our offices in Boise, Coeur d'Alene, and Idaho Falls, our dedicated staff works with a broad spectrum of customers in both the public and private sectors.

By statute we are responsible for:

- Adoption of the fire code as a minimum standard for the state.
- Prescribing regulations and making rules related to the fire code.
- Reviewing plans for all new and remodeled state buildings for compliance with adopted fire codes.
- Inspecting and testing new fire sprinkler systems and fire alarm systems in all new and remodeled state buildings.
- Collecting information on all fires in Idaho.
- Regulating the fire sprinkler industry.
- Reviewing plans for single service fire sprinkler systems installed in Idaho.
- Licensing fireworks wholesale and import businesses.
- Ensuring compliance by cigarette manufacturers with Idaho Reduced Cigarette Ignition Propensity Law.
- Training and certifying local authorities who apply the provisions of the adopted statewide fire code.
- Serving as an avenue for appealing local code application decisions as provided by Idaho law.
- Serving as the Chief Arson Investigator for the state of Idaho.

We also provide assistance to our customers by:

- Assisting local fire jurisdictions with plan reviews, inspections, and code interpretation.
- Conducting classes in fire investigation, code application, and incident reporting.
- Answering questions and providing statistical research for:

  Architects
  Engineers
  Fire Code Officials
  Developers
  Attorneys
  Elected officials
  Law enforcement
  Individual citizens

- Participating in numerous arson task forces statewide and regional fire chief associations.
- Being actively involved in the development of national fire and life safety standards.
- Serving as an active member of the Idaho Lands Resource Coordinating Council.
- Working with the Northwest Insurance Council to establish the Arson Hotline and a reward-for-information program.

CLASSES

Fire Code Official Certification
This three-day class provides exposure to the contents of the International Fire Code and is presented to fire department personnel or to inspectors within a city or county building department upon request of the jurisdiction. The course is intended to provide continuity and consistency of code application throughout the state. A four-hour certification test is conducted at the end of the course.

Arson Detection for the First Responder
Provides the first responder with knowledge and awareness of the detection of possible incendiary fires.

Origin and Cause Fire Investigation
This 16-hour class is based on the National Fire Protection Association (NFPA) 921 Guide for Fire and Explosion Investigations and provides the student with basic origin and cause fire investigation knowledge and principles.

Arson Investigation and Evidence Preservation
Instructs students toward a positive approach to arson investigation and best practices for the collection, preservation, and submission of fire debris evidence to our state lab.

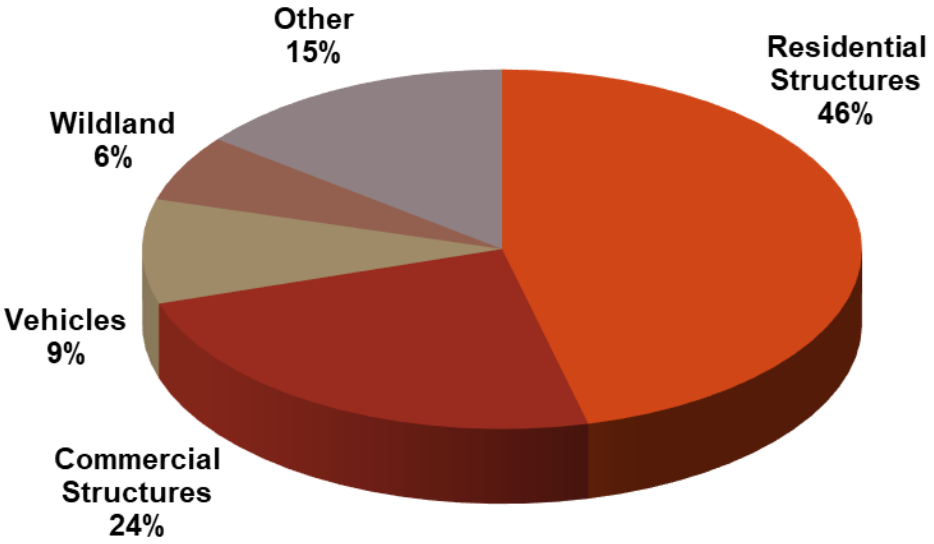
Introduction to National Fire Incident Reporting System (NFIRS)
An introduction to and experience with the NFIRS 5.0 all-incident reporting system. Students learn the purposes and benefits of incident reporting at the local, state, and national levels and receive a basic introduction to all modules and their uses.

Training Courses Customized to Meet Your Needs
We also offer customized training opportunities for fire agencies. Our classes in both fire code and fire investigation can often be modified by content and length to meet individual needs.

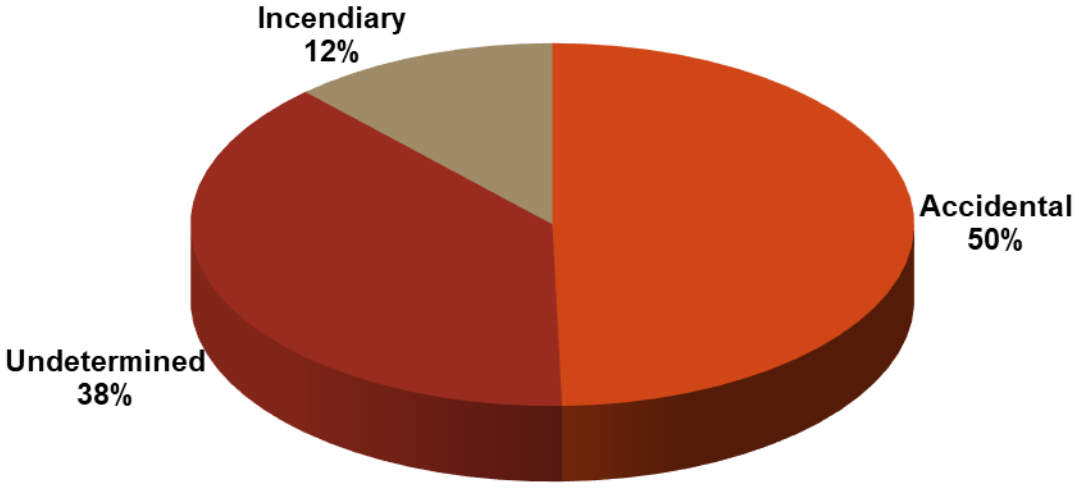
Many of these classes are offered at the following academies:

Central Idaho Fire Academy (Donnelly)
Clearwater County Fire Academy (Orofino)
Eastern Idaho Fire Academy (Ammon)
North Idaho Fire Academy (Coeur d'Alene)
Southern Idaho Fire Academy (Paul)

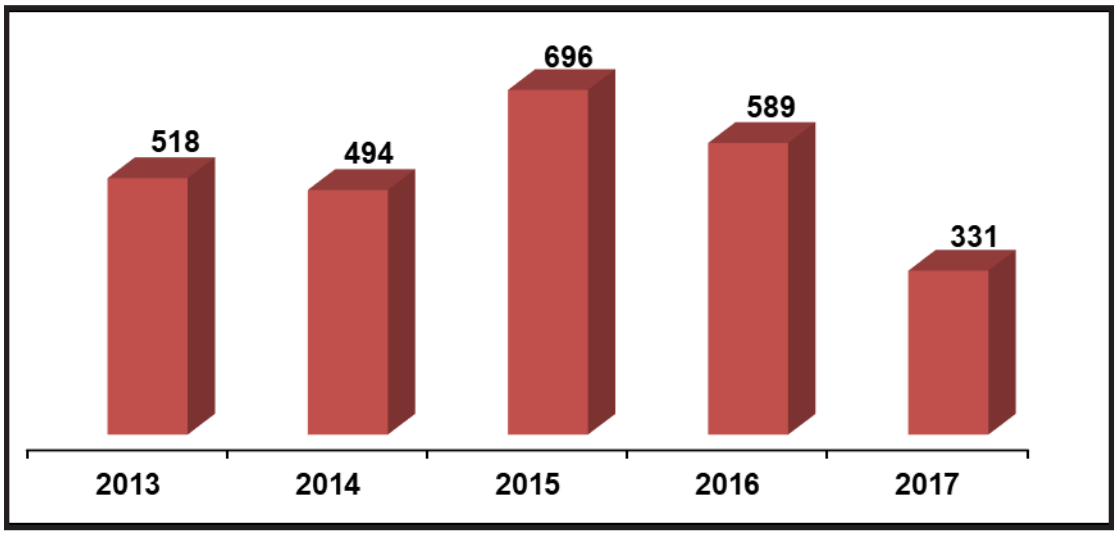
Types of Fires Investigated by State Fire Marshal's Office



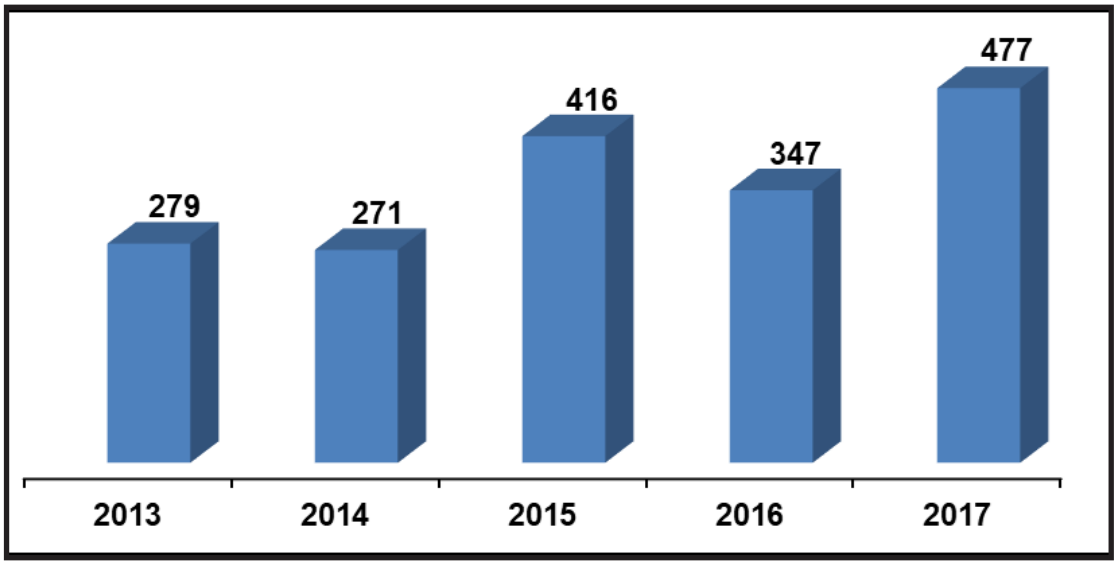
Determination of Cause



Plan Reviews by the Idaho State Fire Marshal's Office

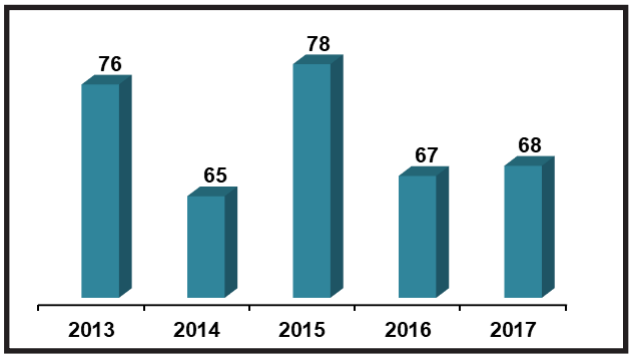


Inspections by the Idaho State Fire Marshal's Office



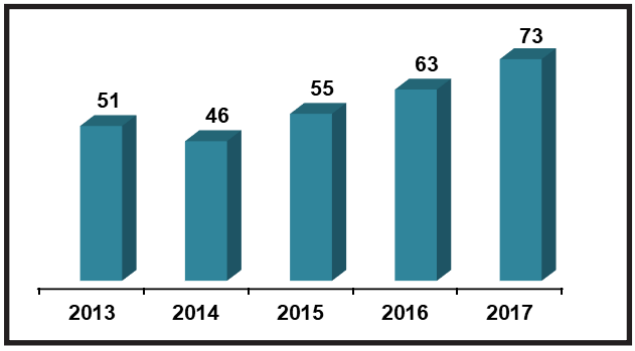
CERTIFICATION AND LICENSING

Fire Protection Sprinkler Contractor Licenses



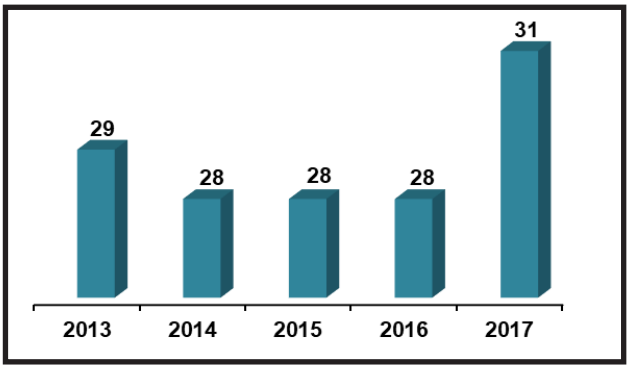
Idaho Code section 41-254(7) and IDAPA 18.01.49 give the State Fire Marshal the responsibility to license and regulate fire sprinkler contractors.

Fire Protection Sprinkler Fitter Licenses



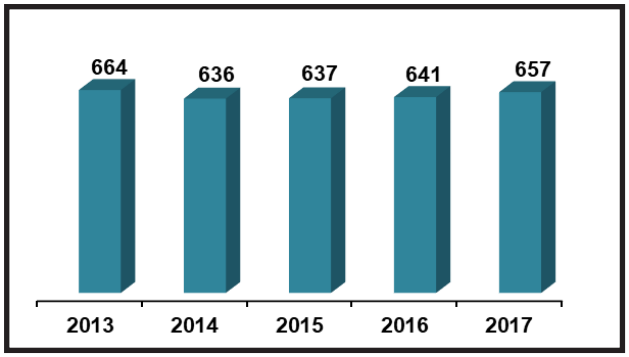
This license is offered by the State Fire Marshal pursuant to IDAPA 18.01.49.23

Fireworks Wholesale or Import Licenses



Idaho Code section 39-2603 require anyone who imports or sells fireworks at wholesale to be licensed by the State Fire Marshal's Office.

Fire Code Official Certifications



Idaho Code section 41-255(6) and IDAPA 18.01.43 require all persons enforcing the Idaho Fire Code to be trained and certified by the State Fire Marshal.

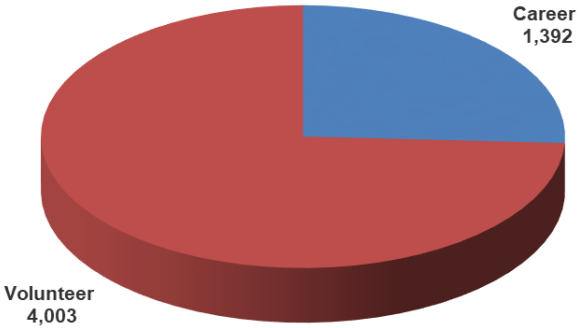
Career and Volunteer Fire Services in Idaho



$5,000 AWARD FUND
It has been determined that this fire is
ARSON
If you have information regarding this fire, please call
1-877-75-ARSON
Callers may remain anonymous
Sponsored by:
NW
Insurance Council
Idaho State Fire Marshal
Department of Insurance

Glossary of Terms and Abbreviations

$ Loss – Combined estimated property and content dollar loss reported by reporting agencies.

Alarm – Any notification to the fire department that a situation exists or requires a response.

Arson – The crime of maliciously, intentionally, and/or recklessly starting a fire or causing an explosion.

Automatic Extinguishing System (AES) – A device or system providing an emergency fire extinguishing function without the necessity of human intervention, typically a water spray.

Casualty – A person who is injured or killed at the scene of a fire or other reported incident.

Cause – The circumstances or conditions that brought about or resulted in a fire or explosion incident, damage to property resulting from the fire or explosion incident, or bodily injury or loss of life resulting from the fire or explosion incident.

Civilian Fire Casualty – Any non-fire service person injured or killed as a direct result of a fire-related incident.

Confined Fire – Fire where the flame does not extend beyond a combustible container such as a cooking vessel, chimney or flue, trash container, etc.

Contained Fire – Fire spread that is reasonably expected to remain in check under prevailing conditions.

Crop – Cultivated vegetation such as grains, trees, orchard, nursery stock, etc.

EMS – Emergency Medical Service.

Fatality – An injury that is fatal or becomes fatal within one year of the incident.

Fire – Any instance of destructive and uncontrolled burning, including explosion, of combustible solids, liquids or gases.

Hazardous Materials – Any material that is air-reactive, corrosive, explosive, radioactive, toxic, water-reactive, or unstable such as flammable gas, organic peroxide, oxidizing material, flammable or combustible liquid. Any substance or mixture of substances that is an irritant or a strong sensitizer or generates pressure through exposure to heat, decomposition, or other means.

Incident – An event to which the reporting agency responds or should have responded. An incident may have more than one response.

Incident Record – The official file on an incident.

Incident Record – The official file on an incident.

Incident Report – A document prepared by fire department personnel about a particular incident.

Mobile Property – Property designed to be movable whether or not it still is, such as vehicles, ships, and airplanes.

Mutual Aid – Assistance given to or received by a fire department, whether fire or non-fire aid, by another fire department outside its normal jurisdiction.

NFIRS – National Fire Incident Reporting System.

Non-Fire Service Personnel – All persons involved with an incident who are not fire service personnel, such as police, utility company employees, non-fire service medical personnel, or civilians.

Origin – The physical location where a heat source and fuel came in contact with each other.

Overpressure – A transient air pressure, such as the shock wave from an explosion, that is greater than the surrounding atmospheric pressure.

Prescribed Fire – Any fire ignited by management actions to meet specific objectives. A written, approved prescribed fire plan must exist prior to ignition. The controlled application of fire to wildland fuels in either their natural or modified state under specified environmental conditions allowing the fire to be confined to a predetermined area and, at the same time, to produce the intensity of heat and rate of spread required to attain planned resource management objectives.

Property Use – The actual use of the property where the incident occurred. A building, for example, could serve as a garage, a hospital or a department store. The use of property does not define any of the other important fire-related details of a property such as access, ownership, size, and internal weaknesses in fire defense or construction.

Response Time – The length of time between notification of and arrival at an incident scene as reported by the responding agency.

Structure – An assembly of materials forming a construction for occupancy or use to serve a specific purpose. This includes, but is not limited to, buildings, open platforms, bridges, roof assemblies over open storage or process areas, tents, air-supported structures, and grandstands.

Structure Fire – Any fire inside, on, under, or touching a structure.

Wildland Urban Interface Area – The geographical area where structures and other human development meet or intermingle with wildland or vegetative fuels.

Wildland – Land in its uncultivated, more or less natural state and covered by timber, woodland, brush, or grass. An area in which development is essentially nonexistent except for roads, railroads, power lines, and similar facilities.

Wildland Fire – Any involved vegetative fuel, other than prescribed fire, that occurs in wildland. A wildland fire may expose or possibly consume structures.
