PERSI

There are state retirees and school district retirees – each school district is different

- Many schools' districts contract for retiree coverage with the same company that active employer coverage was provided by. Check with the individual School District Human Resources (HR) Department for details.
- Client has unused sick leave through PERSI to use towards their medical premiums:
- What companies are you limited to choosing from? Employer Human Resources (HR) should be able to provide this information.
- What is the dollar amount they have to use? Employer or PERSI should be able to provide this information.
- You do not get a special enrollment into another insurance once the employer benefit runs out. At that point the beneficiary is responsible for the full premium. The individual can decide to switch into a different plan during the Annual Enrollment Period (AEP).
- SHIBA can help compare MAPD and Medigap/PDP Plans within the plan options that are available to the individual to choose from.
- If the client is a State of Idaho retiree able to use unused sick leave they are limited to these companies. Questions direct to State of Idaho Office of Group Health
