**BULLETIN NO 20-14**

**DATE:** November 4, 2020

**TO:** All Fire Chiefs  
All Fire Code Officials  
Fire Protection Contractors

**FROM:** Knute C. Sandahl, State Fire Marshal

**SUBJECT:** Adoption of the 2018 edition of the International Fire Code

---

Effective January 1, 2021, the Idaho State Fire Marshal's office intends to adopt the 2018 edition of the International Fire Code. The adoption of the International Fire Code is the agency interpretation of existing law and is authorized by Section 41-254, Idaho Code.

This adoption retains all previously accepted exceptions or amendments. Amendments to the code are specified in the Idaho Administrative Procedures Act (IDAPA) 18.08.01, which include:

- 020. Sky Lanterns
- 021. Driveways
- 027. Fire Extinguishing Systems
- 031. Explosives and Fireworks

This adoption coincides with the adoption of the International Building and Residential Codes administered by the Idaho Division of Building Safety. Included in this adoption are appendices B, C, D, E, and F as required by the code. Appendix B details the requirements for fire flow, or water supply, for buildings. Appendix C provides the requirements for fire hydrant locations and distribution. Appendix D outlines the requirements and design for fire apparatus access roads. Appendix E & F provide information and explanation to clarify hazard categories and classifications outlined in Chapter 50 of the code and National Fire Protection Association (NFPA) 704.

The NFPA referenced standards identified in Chapter 80 of the International Fire Code are hereby adopted, as indicated below. These referenced standards provide additional detailed information on construction, installation, and maintenance for specific fire protection measures that complement the International Fire Code.

NFPA Standard	Year Edition	NFPA Standard	Year Edition	NFPA Standard	Year Edition	NFPA Standard	Year Edition
2	2020	34	2018	120	2020	505	2018
4	2015	40	2019	160	2016	652	2019

30B	2019	101	2018	410	2020	2001	2018
31	2020	105	2019	484	2019	2010	2020
32	2016	110	2019	495	2018		
33	2018	111	2019	498	2018		

The fire code establishes the minimum requirements consistent with nationally recognized good practices for providing a reasonable level of life safety and property protection from the hazards of fire, explosions or other dangerous conditions in both new and existing buildings, structures and premises. In addition, the code provides a reasonable level of safety to fire fighters and emergency responders during emergency operations.
